

MultiREBAR Video Tutor

Training on Demand

The MultiREBAR Video Tutor is designed to take the hard work out of software training...no more tedious manuals to wade through... just sit back, watch and listen to an expert, and learn...FAST.

We are not just talking about the basics; this is in-depth training to ensure that you get the very best out of your software investment. And not just now, but in the future too. Because all owners of **Video Tutor** with **MultiSUITE** maintenance on their **MultiREBAR** software, will receive training updates to cover all new features in the product.

MultiREBAR Video Tutor is truly "training on demand", when and where you need it. Find any topic in seconds through the unique interface. Less frustration and more productivity, combined with lower costs. Keeping staff trained is expensive and time consuming. **MultiREBAR Video Tutor** is a one-off investment and provides an essential resource permanently available to all of your staff.

Staff turnover or recruiting for a project can be a nightmare in training terms - not any more. New staff can simply work steadily through the structured course, and because of the nature of the "watch and learn" process combined with hands-on practice, results are guaranteed!

Includes:

10 hours of CD-based video training on your AutoCAD® workstation

30 sample AutoCAD® drawings are provided

120 individual training topics are provided

Also covers **MultiSUITE** configuration issues, and many important areas of **MultiDRAFT** including scaling, title block customisation, layer configuration, network installations etc

How it Works

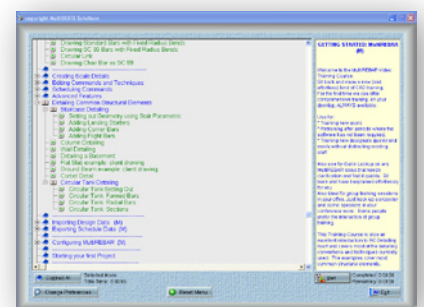

The **MultiSUITE Video Tutor** series has been developed to provide the easiest and quickest way yet of learning the **MultiSUITE**.

- Instructor-led videos and clear worked examples, provide guided hands-on practice.
- Each menu topic starts a separate video which can be paused easily whilst the material is worked through in your AutoCAD® session.
- Cascading menu system means topics can be found easily. A side panel provides vital additional information on each topic.
- The system retains a viewing history as you progress through the course, by colour coding the menu options, and always places you after your "last viewed" topic.

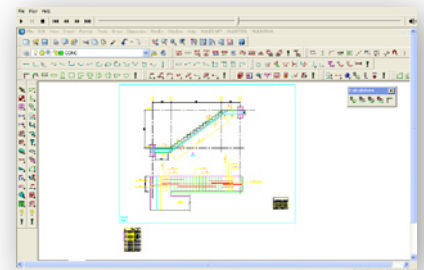

If you work steadily through the course and practice the routines as instructed then a thorough knowledge of **MultiREBAR** and hence high productivity are guaranteed.
